SUMMARY

AI & Data Science graduate (B.Tech, 2026) seeking a Trainee Software Engineer role. Programming foundation in C, Java, and Python, with hands-on internship experience in manual and functional website testing, bug tracking, and structured test case design. A quick learner with strong analytical thinking and problem-solving ability, eager to build expertise in new technologies and contribute to product development, testing, and support activities.

KEY SKILLS

- Programming: C, Java, Python
- Database: MySQL, basic SQL queries
- Manual Testing: Functional Testing, UI Testing, Regression Testing
- Bug Tracking & Reporting using structured test cases
- Test Case Design & Execution
- Cross-functional Collaboration with Development Teams
- Tools: Excel

INTERNSHIP

AI Development Intern – 99 Ideas SaaS Pvt Ltd, Baner, Pune *MAR 2026 – JUN 2026*

- Performed manual testing of web applications including functional, UI, and regression testing
- Identified and reported bugs using structured test cases, improving overall website quality
- Documented test results and bug reports in a structured format to clearly communicate issues to the development team
- Participated in regression testing cycles after bug fixes to confirm that fixes did not introduce new issues
- Collaborated with the development team to verify bug fixes and ensure smooth user experience

Python Programming Intern – Data Pointer Technologies, Remote *JUL – AUG 2025*

- Developed Python scripts for data processing and basic analysis workflows
- Worked with structured datasets to perform cleaning, transformation, and basic analysis using Python
- Documented code and processes to ensure clarity and reproducibility of scripts
- Collaborated on practical coding tasks and delivered solutions within deadlines

Python Programming Intern – CodSoft, Remote *JUL – AUG 2024*

- Built Python mini-projects covering automation, file handling, and data manipulation

- Implemented file handling and automation scripts to streamline repetitive tasks
- Practiced debugging and basic code optimization techniques to improve script efficiency
- Strengthened core programming skills through real-world task-based assignments

PROJECTS

Quiz Application with Timer – HTML, CSS, JavaScript

2024

- Developed an interactive multiple-choice quiz platform with a built-in question bank covering multiple topics/difficulty levels
- Implemented a real-time countdown timer per question using JavaScript, with automatic answer submission when time runs out
- Built dynamic score tracking and a results summary screen showing correct/incorrect answers at the end of the quiz
- Designed a responsive layout with CSS so the quiz works smoothly across desktop and mobile screen sizes
- Applied manual test cases to validate timer accuracy, answer-selection logic, and edge cases such as last-second submissions

Virtual Assistant – HTML, CSS, JavaScript

2024 – 2025

- Built a web-based virtual assistant supporting both voice and text input for hands-free interaction
- Integrated the Web Speech API for voice recognition and text-to-speech output to read responses back to the user
- Implemented basic command parsing logic to handle query answering and website navigation requests
- Designed a clean, conversational UI to display interaction history between the user and the assistant
- Tested functionality across multiple browsers (Chrome, Firefox, Edge) to ensure consistent UI behavior and voice recognition compatibility

Heart Disease Prediction – Python, Pandas, Scikit-learn

2025 – 2026

- Built a machine learning classification model to predict heart disease risk using patient health parameters such as age, blood pressure, and cholesterol levels
- Performed data cleaning using Pandas, including handling missing values and correcting inconsistent data entries
- Conducted Exploratory Data Analysis (EDA) to visualize feature distributions and identify correlations between health parameters and disease risk
- Applied feature selection techniques to retain the most relevant predictors and reduce model complexity
- Trained and compared Logistic Regression and Random Forest models using Scikit-learn, evaluating performance with a train-test split

EDUCATION

B.Tech – Artificial Intelligence and Data Science

NOV 2022 – JUN 2026

Government College of Engineering, Ratnagiri (Result Awaited)

HSC – Science | 75.33% – Maharashtra State Board

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Machine Learning, Artificial Intelligence, Python Programming, Java Programming.

AREAS OF INTEREST

- Software Testing & Quality Assurance
- Web Application Development
- Artificial Intelligence & Machine Learning
- Problem Solving & Programming

PERSONAL DETAILS

- Date of Birth: 23/10/2004
- Languages Known: Marathi, Hindi, English
- Hobbies / Interests: Solving coding problems, exploring new technologies, reading tech blogs
- Nationality: Indian

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.

Place: Chiplun

Date: 04/07/2026
